

Bio Ingrid Rauter, PhD, MSc

Ingrid Rauter has graduated with high distinction from Vienna University in Austria with a PhD and MSc in Genetics. Continued her scientific career in Immunology with postdoctoral fellowships in Vienna at the Medical University of Vienna and Harvard Medical School, Boston, USA. Ingrid Rauter has a proven track record which resulted in numerous peer-reviewed, high prestigious publications and she received awards and grants from the Austrian Science Fund as well as from the German Society of Immunology. In the last 13 years she has held various leadership positions with growing responsibility within R&D in global pharmaceutical companies – Baxter/Baxalta Inc.; Sandoz International; Takeda Inc. and Amgen Inc. Since January 2023 she is Global Head of R&D and Chief Medical Officer of Vaccentis AG. She has industry experience global leading positions in early research, clinical development to global medical affairs. Ingrid has also led multiple successful medical pre-launches and launches, including launch readiness activities - preparing the market from a medical perspective enabling commercial teams to seamlessly commercialize. Ingrid further has broad life-cycle management experience and was part of various due diligence assessments.
