

## Ingrid Rauter

Ingrid Rauter holds a PhD and MSc in Genetics from the University of Vienna and completed postdoctoral fellowships in immunology at the Medical University of Vienna and Harvard Medical School. Her academic work resulted in multiple peer-reviewed publications and competitive research grants.

Over the past 13 years, she has held senior R&D leadership roles at Baxter/Baxalta, Sandoz, Takeda and Amgen, covering early research, clinical development and global medical affairs. She has led international clinical programs, supported launch readiness activities and contributed to life-cycle management and due diligence processes.

Since January 2023, she has served as Global Head of R&D and Chief Medical Officer of Vaccentis AG, where she is responsible for scientific strategy, clinical execution and medical governance.
